

## Advanced Structures + Integrated Cladding

Novum Structures is a global leader in the design, engineering, production and installation of technically advanced structures and integrated cladding. Our specialization is in steel, glass and membranes. Comprehensive client services, from design development through project execution, allow Novum to deliver timely, quality results to architects, owners and contractors.

- Single source specialty contractor providing the following services:

Design	Engineering	Project Management	Manufacturing
Sourcing	Scheduling	Installation	Warranty Support
- 25 years of project experience.
- Global presence with facilities in the USA, UK, France, Germany, Italy, Turkey, South Africa, UAE, India, Singapore and China.
- Significant bonding and financial capacity.

## Project Experience

Novum has a wealth of project experience, with more than 1,600 projects in over 25 countries.

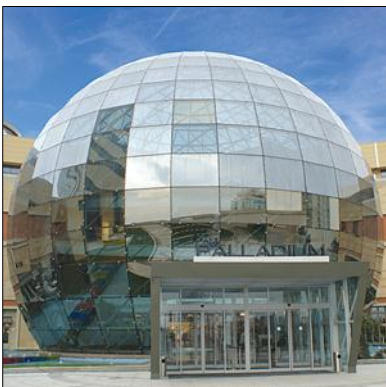

MGM CityCenter, ARIA Resort & Casino, Las Vegas, Nevada, USA

Heathrow Airport, Forecourt to Terminal 3, London, UK

Foundry Square I  
San Francisco, California, USA

## Novum System Products

The logical and innovative Novum Product Menu features 18 systems divided into four categories: Structural Systems, Structural Component Systems, Glazing Systems and Membrane Systems. Novum's in-house engineering department matches each client's needs with the appropriate unique combination of interchangeable, pre-designed Novum Systems. Infinite value driven architectural solutions are possible using the flexibility of Novum Systems.

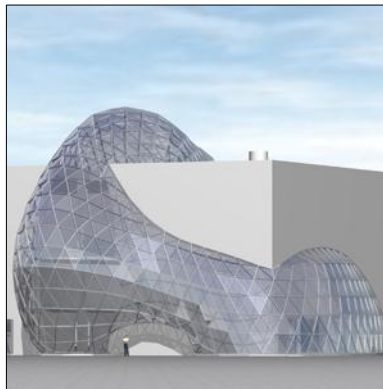

## Client Services

### Design Development + Pre-Construction

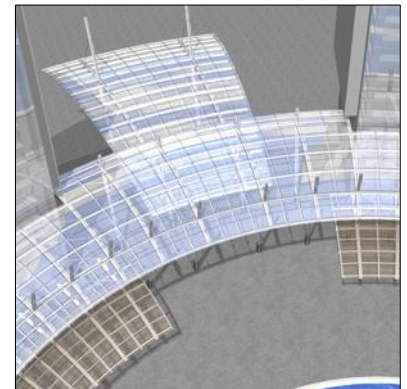

Listening drives design. In the developmental phases we listen to the client team, asking questions, understanding and prioritizing needs and identifying possible solutions. Novum design engineers and estimators recommend potential combinations of system products based on three primary criteria: design, schedule and budget.

Marina Bay Station  
Singapore

The Dalí Museum  
St. Petersburg, Florida, USA

Porta Nuova Garibaldi  
Milan, Italy

### Engineering + Project Execution

Novum's highly skilled and internationally educated engineering teams play an important role in project development and code compliance. Transitioning from design to execution requires attention to detail. Novum excels at providing the necessary project management, production and on-site supervision to complete projects on time and within budget.

### Post Construction

Warranty support and optional maintenance are an integral part of every Novum project, providing clients with the security of knowing that Novum's care and expertise extend beyond initial occupancy. Our low warranty expenditures and repeat business are indicative measures of success.

## Novum Philosophy

The Novum philosophy, "think global, act local," provides several competitive advantages. By having direct company employees in local offices around the world, Novum is able to offer personalized service at the local level. Expert engineering teams exist in the USA, Germany, UK, South Africa, India and China, providing solutions to the most challenging projects, regardless of location. Project management is always local. Novum companies work cooperatively to source the best quality products at the best price. Novum production facilities maintain excellent quality control by using specialized international vendors for key commodities.
